

A quick guide to setting up your integration

1. Connect PetScreening to OwnerRez
 - a. Property managers will login at <https://dashboard.petscreening.com>
 - b. If you do not have an account, please request a demo here: <https://www.petscreening.com/industries/vacation-rentals>

The image shows the PetScreening login page. At the top is the PetScreening logo. Below it, the text "Please sign in below" is centered. There are two input fields: "Username" with the placeholder "Username or email" and "Password" with a toggle icon. Below the password field is a checkbox labeled "Remember me". A blue "Sign In" button is centered below the inputs. Below the button, there is a link "Forgot Password? Reset Password". At the bottom, there is a footer with links for "Resources", "Privacy policy", "Terms of service", an email address "Email us at clientsupport@petscreening.com", a "Copy" button, and a copyright notice "© PetScreening, Inc. All Rights Reserved."

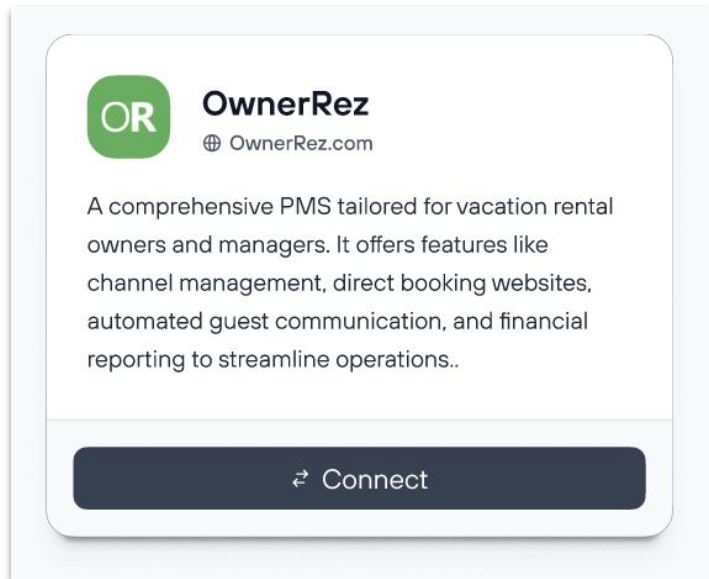

2. Navigate to **Settings > Integrations** in PetScreening

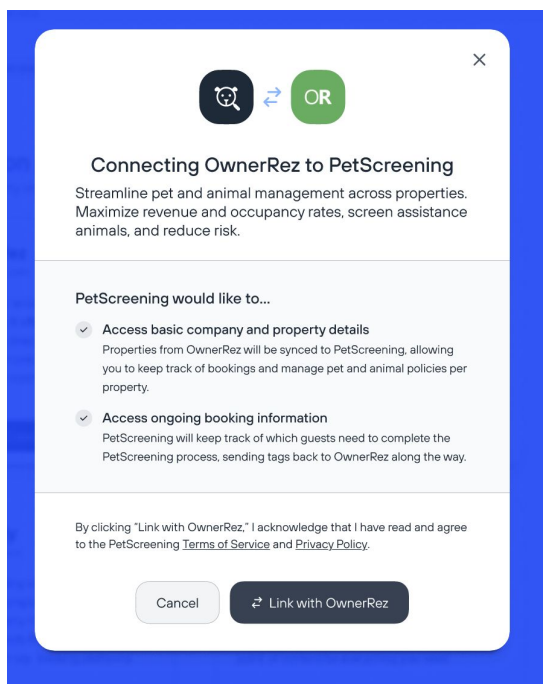

The image shows the PetScreening Integrations page. On the left is a sidebar with a "Back" button and a list of settings: "Settings", "Integrations" (highlighted), "Policies", and "Notifications". The main content area has a header "Integrations" with a "No PMS linked" status. Below this is a section titled "Our integration partners" with the text "Connect PetScreening to your property management software platform." There is a card for "OwnerRez" with its logo, name, and website. The card describes it as a comprehensive PMS for vacation rental owners and managers, offering features like channel management, direct booking websites, automated guest communication, and financial reporting. A "Connect" button is at the bottom of the card. The footer is identical to the login page.

A quick guide to setting up your integration

3. Click “Connect” on the OwnerRez integration tile.

4. A popup will appear with more information about the integration – click **“Link with OwnerRez”** to proceed.

A quick guide to setting up your integration

5. Sign into OwnerRez (if prompted) and click **“Authorize PetScreening”**

OwnerRez

Authorize Petscreening

Authorize OwnerRez to securely share your data with Petscreening

NC Rentals

Petscreening

By clicking Authorize, I allow OwnerRez and **Petscreening** to use my information in accordance with each company's respective terms of service and privacy policy.

No, thanks!

Authorize Petscreening

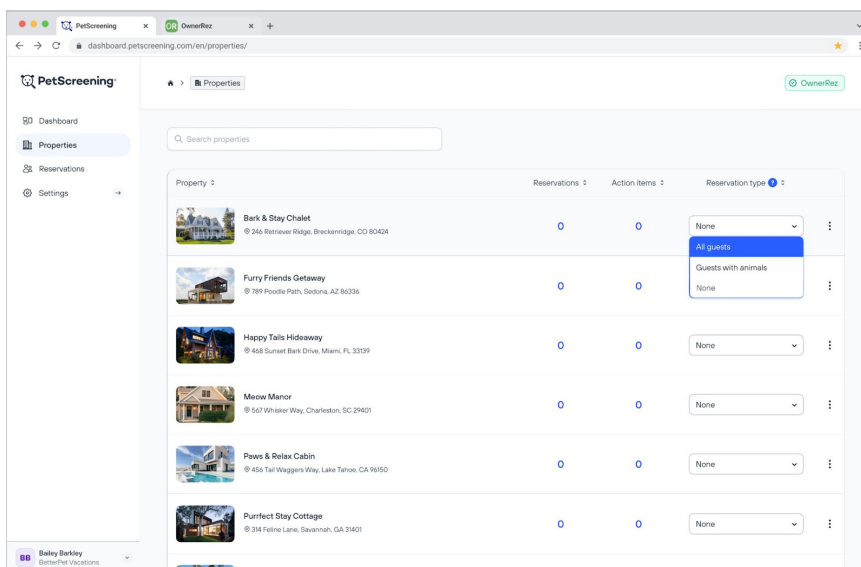

Authorizing will redirect to
<https://dashboard.petscreening.com/en/settings/integrations/?integration=ownerRez>

6. You'll then be redirected back to PetScreening

A quick guide to setting up your integration

Configure Properties

7. Go to the Properties page in the left navigation. You will now see properties imported from OwnerRez.
8. Configure the “Reservation Type” setting for each property to determine which reservations should be processed through PetScreening:
 - a. “All guests” (Recommended): All reservations for the property will be added to PetScreening requiring every guest to complete the PetScreening process. This ensures any pets or assistance animals are properly identified.
 - b. “Guests with animals”: Only reservations that include a pet or animal in the booking will be displayed in PetScreening. Guests without animals will not go through PetScreening.
 - c. “None”: Booking for the property will not be imported into PetScreening. Use this option to exclude specific properties from PetScreening.

A quick guide to setting up your integration

Once properties are configured and policies are updated, the integration is ready to go! The next time a guest books, PetScreening will import the information and send OwnerRez a unique Guest URL for the guest to complete their pet/animal screening (details below).

Getting Guests Started

Each time a guest books, PetScreening generates a unique Guest URL and sends it to OwnerRez. This link allows the guest to complete the PetScreening process for their booking, with status updates sent back to OwnerRez.

How to Share the URL with Guests

- You are responsible for ensuring guests receive their PetScreening guest URL (via email, in-app message, SMS, etc.)
- The URL is stored in OwnerRez as a Custom Field, with the value populated at the time of booking.
- The URL is also accessible from the PetScreening Reservations page – click the 3 vertical dot menu next to a reservation and select **“Copy guest link”**.

Automate Guest Notifications

- Set up templates and automated triggers in OwnerRez to send guest their PetScreening Guest URL automatically.
- **Recommended Trigger:** Send the Guest URL when the “PetScreening Not Started” tag is added to a reservation. This ensures the link is defined and that settings between OwnerRez and PetScreening are aligned.

The PetScreening team is available to assist with template and trigger setup – contact clientsupport@petscreening.com for help.
