

PetScreening + MRI Integration Activation Guide

MRI and PetScreening have developed a data integration that allows mutual customers to benefit from an easier setup as well as a faster rate of information in and out of our system. There is no additional cost to set up the integration. This integration allows for automated data transfer of:

1. Applicant & resident data with applicable lease start & end dates
2. Property & Unit address information
3. PetScreening profile notes

Integration Setup

The PetScreening - MRI integration consists of the following 3 steps:

1. You must have a MRI “Partner Connect” Agreement in place, this authorizes PetScreening to access data. Please contact your MRI Account Executive in order to make sure this is in place.

2. Please submit a support case via the myMRI Client Portal requesting the following:

Please create a Web Services User ID/Password for our integration with PetScreening

Please apply the following cabinet(s) to our test database <enter database name here>.

- Cabinet Location: (field will be filled in by MRI personnel once the case is submitted)
- Please grant the Web Services user access to the following API(s)
 - MRI_S-PMRM_PropertyIDByNameOrAddress
 - MRI_S-PMGL_EntityListing
 - MRI_S-PMAM_Locations
 - MRI_S-PMRM_ProspectsApplicantsAndResidents
 - MRI_S-PMRM_ResidentialUnits
 - MRI_S-PMRM_ResidentLeaseDetailsByPropertyID
 - MRI_S-PMRM_PetInformation
 - MRI_S-PMRM_ResidentialRenewalOffers
- Please also provide the following information: Web Services User ID:
 - Web Services Password:
 - Client Database Name:
 - Client ID:
 - Partner Key:
 - API URL:

3. You will send this information to PetScreening upon case completion.
