

Simplify property and pet management with PetScreening and ResMan

ResMan offers property management users access to PetScreening's platform, allowing them to manage their business from a single hub.

KEY BENEFITS

Increase Pet Revenue

FIDO Score™ assigns risk levels to pets, similar to credit scores, allowing property managers to adjust deposits and fees based on associated risk.

Reduce Unauthorized Pets

Residents legally affirm they understand your pet policies regarding pet sitting, visits, fosters, or mid-lease adoptions to avoid potential recourse.

Stop Fake ESAs

PetScreening's in-house assistance animal review team reviews each request and authenticates documentation with the healthcare provider.

Access Pet Data in ResMan

Seamless access to pet data supports informed decision-making, promoting a harmonious living environment for both residents and pets.

Automate Email Notifications

Automated email notifications and reminders for residents are sent out on your behalf. Tailor the frequency of the application status emails you receive.

Go live with PetScreening in under 2 weeks!

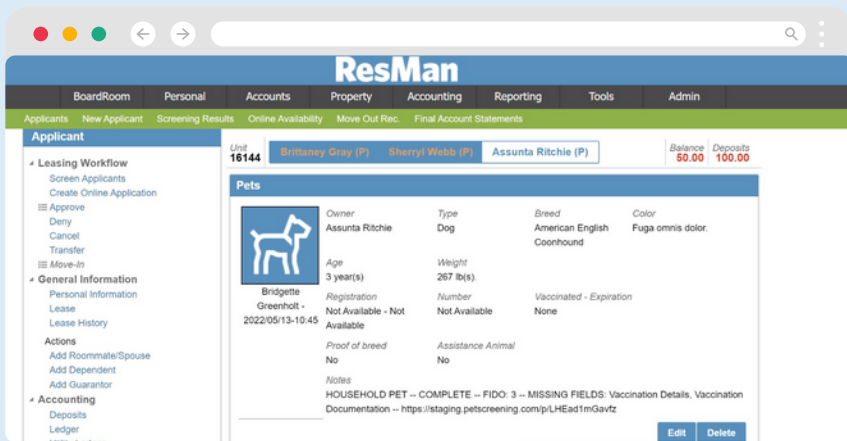

Once you have spent 15–20 minutes to fill out your [online setup sheet](#), expect your property to go live in less than 2 weeks.

THE PETSCREENING & RESMAN 2-WAY INTEGRATION

PetScreening
fits seamlessly into
your existing
ResMan pipeline!

*View in your ResMan Pet Section > General Notes

How does the PetScreening x ResMan Integration work?

New Applicants

An email with profile setup instructions is sent to new applicants after they submit a rental application.

Current Residents

Built-in notifications are sent out to remind current residents to complete their PetScreening profile.

What data does ResMan receive?

- Profile Type, Status, and URL
- Pet Name, Breed, and Weight
- FIDO Score for Pet Profiles
- Missing Required Fields

What data does PetScreening receive?
